

# Mukund Mauji

mauji.mukund@yahoo.ca | (416) 735-8790 | maujim.github.io

## Education

**B.A.Sc Mathematics and Engineering (Systems and Robotics)** | Queen's University **Class of 2020**

- Awards: 125<sup>th</sup> Anniversary Engineering Excellence Award, Excellence Scholarship, Science '68 Scholarship

## Experience

**Hardware Engineer** | Cisco Meraki **San Francisco, USA | May 2019 – Sept. 2019**

- Led the research and validation stages of a new product for the camera line, Meraki's fastest growing product line
- Performed field testing and wrote a report to illustrate competitive advantages of product in various situations
- Compiled all necessary information to write a Parts Requirement Document (PRD) to kickoff the project
- Completed hardware debugging to help solve motor issues

**Business Technology Analyst** | Deloitte **Toronto, Canada | May 2018 – Sept. 2018**

- Implemented facial recognition technology to recognize and save faces to a database using a Raspberry Pi and camera
- Developed modular application (Python, OpenCV) for real-time classification and model retraining
- Established databases using AWS DynamoDB to upload model data for higher-characteristic trait analysis
- Designed application development under ongoing client needs and collected user requirements

**Engineering Tutor** | EngLinks **Kingston, Canada | Nov. 2016 – Present**

- Tutored extensively one-on-one and in small groups, both in ongoing and single-topic sessions
- Prepared and delivered exam prep workshops for 60 - 100 people
- Subjects: Calculus I/II, Linear Algebra, Intro to Programming, Engineering Graphics, Math and Science (Gr. 10 - 12)

## Extracurricular activities

**Co-Chair** | QHacks **Kingston, Canada | Apr. 2019 – Present**

- Oversaw the planning and execution of Queen's fifth annual hackathon
- Maintained and grew relationships with strategic and community partners, raising a budget of over \$120,000
- Hired and led the 27-person executive team
- Worked with all subteams to solve problems in order to achieve common goals

**Co-Chair** | Queen's Engineering Competition **Kingston, Canada | Apr. 2018 – Apr. 2019**

- Worked in collaboration with a co-chair to coordinate and plan all aspects of a \$30,000 engineering competition
- Hired and managed a team of 20 members to organize the event, introducing agile methodology to streamline efficiency while applying organizational behavior principles to uphold team morale
- Implemented 5 new competitions, increasing the number of events by 300%, and attracting over 200 delegates

## Projects

**Haskap Berry Harvester** **Queen's University | Jan. 2017 – May 2017**

- Designed and built a berry harvester prototype for a 2-acre farm within physical, financial and design constraints
- Researched existing and upcoming harvesting technologies extensively to determine their strengths and weaknesses
- Determined final solution from multiple choices using weighted evaluation matrices based on design criteria
- Created 3D models and 2D views of several versions of the harvester using SolidEdge
- Compiled all results into a 20-page report detailing the process, implementation methods, all previous iterations and all supporting research

**ConUHacks II** **Concordia University | Jan. 2017**

- Created a Twitter bot during a 24 hour hackathon; the bot parsed the tweet for the name of a commercial product and responded in real time with its nearest retail location
- Used a NodeJS server that communicated with Yellow Pages and Twitter APIs to respond to tweets containing a specific hashtag

## Skills

**Languages:** Hindi, French, Spanish

**Programming:** Python, Dynamic HTML, Latex, MATLAB, C
