

Mukund Mauji

mauji.mukund@yahoo.ca | (416) 735-8790 | maujim.github.io

Education

B.A.Sc. Mathematics and Engineering

Queen's University | 2020

- Specialization in Systems and Robotics
- Awards: 125th Anniversary Engineering Excellence Award, Excellence Scholarship, Science '68 Scholarship

Experience

Software Developer | Mosaic Manufacturing

Toronto, Canada | Sept 2020 - Present

- Implemented seam hiding to increase print quality of all multi-material models by 50%
- Optimized infill density algorithm to allow more granular control, expanding the range of options by 3x
- Maintain 3D slicer (C++11) that powers Canvas (canvas3d.io), the world's first multi-material slicer
- Fix printing issue that caused models to be sliced as disjoint pieces

Hardware Engineer | Cisco Meraki

San Francisco, USA | May 2019 - Sept 2019

- Led the research and validation stages of a new product for the MV smart camera line
- Completed hardware debugging to solve motor issues in existing products
- Performed field testing and wrote a report to illustrate competitive advantages of product in various situations
- Compiled all necessary information to write a Parts Requirement Document (PRD) to kick off the project

Business Technology Analyst | Deloitte

Toronto, Canada | May 2018 - Sept 2018

- Implemented facial recognition technology on a Raspberry Pi to save facial data to a database
- Developed modular application (Python, OpenCV) for real-time classification and model retraining
- Established databases using AWS DynamoDB to upload model data for higher-characteristic trait analysis
- Designed application development under ongoing client needs and collected user requirements

Projects

Undergraduate Thesis Project

Sept 2019 - Apr 2020

- Topic: Prosthesis Design Using Stochastic Control Theory
- Explored different methods to quantify optimal paths for a prosthetic limb
- Researched algorithms to quantize brain signals into force inputs to arm
- Implemented a Linear Quadratic Gaussian controller to track random and zero-reference trajectories

Pneumonia Detection in Chest X-rays

Oct 2019 - Apr 2020

- Built a CNN (TensorFlow) to detect pneumonia in chest x-rays
- Created a data input pipeline with built-in preprocessing using the TFRecord module
- Implemented a custom Spatial Pyramid Pooling layer to allow for images varying sizes

Leadership Experience

Co-Chair | QHacks

Kingston, Canada | Apr 2019 - Feb 2020

- Spearheaded the planning and execution of Queen's fifth annual hackathon (qhacks.io)
- Fostered relationships with strategic and community partners, raising a budget of over \$80,000
- Hired and managed 25-person executive and 40 volunteers to ensure the event ran smoothly for 250+ delegates
- Introduced agile methodology and organizational behaviour principles to maintain efficiency and team morale

Skills

Languages: Hindi, French, Spanish

Programming: Python, C++, MATLAB, Git, Bash
